

BIOSYSTEMS ENGINEERING

UA Costa Rica

Spend a semester abroad in Costa Rica and study engineering through an international lens at UA Costa Rica, hosted by Universidad Veritas. You'll get to immerse yourself in the local culture and will feel a sense of community by living and learning right in the heart of capital city, San José. UA Costa Rica offers a variety of courses in English to choose from that may be used to satisfy general education requirements or electives. Awaken your inner artist, humanist, or social scientist by taking regionally specific general education courses, with the approval of your academic advisor.

Faculty in the College of Engineering preapproved a handful of classes to satisfy technical electives within your Biosystems Engineering major. Additionally, you may also have the opportunity to take a design elective. It is always recommended you work in collaboration with your academic advisor when choosing classes.

The best part is, you'll pay your regular UArizona tuition and get to use financial aid and scholarships, including **AZ Excellence** and **Wildcat Excellence** awards! Get ready to go abroad and get ahead at UA Costa Rica!
