

Go Abroad & Get Ahead!

UArizona

Study Abroad

PHYSIOLOGY & MEDICAL SCIENCES

UA Sydney

Spend a semester in Australia, and study Physiology & Medical Sciences through a global lens. At UA Sydney, students can immerse themselves in the local culture and will feel a sense of community by living and learning right in the heart of the city. Our partner institution, University of Technology Sydney is ranked as the #1 young university in Australia and is also the top Australian university for research impact!

Though the program is open to all Physiology & Medical Sciences majors, the courses available at UA Sydney are a great fit for students in the Exercise and Extreme Physiology emphasis area. Studying abroad is highly recommended to students on pre-health tracks as well so they can expand their soft and cross-cultural skills, helping them gain a competitive edge when applying to professional schools.

The best part is, you'll pay your regular UArizona tuition and get to use financial aid and scholarships, including **AZ Excellence** and **Wildcat Excellence**!
